## **Enforsys to Present Groundbreaking Police Data Network At 2006 National Public Safety Forum**

**ROSELAND, NJ, JULY 26, 2006** – Enforsys, Inc., a leading developer of public safety software for first responders, today announced that its vice president, Chief William Plate (Ret.), will present the company's breakthrough police data network solution at the 2006 National Forum on Criminal Justice & Public Safety (July 30 – August 2, 2006). The presentation, which is scheduled for 12:00 P.M on Tuesday, August 1, will take place at the Marriott Baltimore Inner Harbor at Camden Yards, Baltimore.

The 2006 National Forum on Criminal Justice Public Safety, which is sponsored by the National Criminal Justice Association (NCJA), The Integrated Justice Information Systems (IJIS) Institute, The Bureau of Justice Assistance (BJA), and The U.S. Department of Justice provides a unique perspective on public safety, bringing together federal, state, and local law enforcement officials with corporate representatives dedicated to preserving past public safety successes and eliminating future threats.

The police data network being presented by Enforsys is part of the company's I-3 Exchange system, a unique software that can interpret data from a variety of sources and consolidate it onto one platform to provide unprecedented flexibility in information sharing, enabling collaboration across multiple law enforcement agencies, regardless of the specific systems used.

"We have applied cutting-edge technology to better equip first responders in the field with real-time and relevant information," commented Plate. "This has resulted in increased situational awareness and proactive policing, and most importantly, increased safety for our citizens."

Enforsys was recently selected to implement a groundbreaking multi-million dollar initiative to tie together the disparate information management systems of local law enforcement agencies in New Jersey. This initiative is employing mobile data terminals to link police departments, the county sheriff, as well as the prosecutor and emergency management agencies in Morris County. Part of a six-county Urban Area Security Initiative, the program was set up by the federal government to coordinate regional response to acts of terrorism.
