New CEO for Enforssys

Enforssys new CEO comes in with Law and Software Experience

It is with great pleasure we announce Enforssys has brought on a new leader, Gerard Britton. Gerard began at Enforssys as its C.E.O., responsible for providing strategic leadership to the Company. Prior to Enforssys, Gerard worked in a variety of executive roles in the fraud, investigations and electronic discovery industries, focusing on technical solutions to complex challenges. He was also Of Counsel at the New York office of Constantine Cannon LLP. He has 15 years' experience in law enforcement, having served as the head of the Insurance Fraud Unit in the Morris County Prosecutor's Office and as a Deputy Bureau Chief in the Office of the Kings County District Attorney. Gerard has a J.D. from New York Law School, an M.S. from Utica College, and a B.S. in Engineering from the City University of New York.

Enforssys is finishing upgrades to its new, more robust PoliSys® platform. Clients will receive the upgrade free as part of their maintenance and update package.

With the upgrades made to the PoliSys® EE application we will have the ability to offer a host of new optional features and solutions.

These new features include but are not limited to:

- Tow Rotation Module.
- Enhanced GIS Incident mapping Module.
- Camera Surveillance Module.

Keep an eye out for updates to this newsletter for the availability of our other new modules, including: bicycle registration, surveillance camera feed, special needs, Vehicle Maintenance and AVL..

Enforssys prepares for next major release of the PoliSys® EE application. Update comes as part of your yearly maintenance fee.

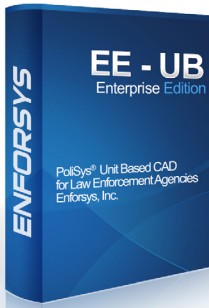

NJTR1 Update

With the help of our customers we have been able to accomplish the integration of the new, state mandated Crash Investigation Report (NJTR-1). This report was mandated to be used effective January 1, 2017 and although the State had provided fillable PDF's for this reporting, you asked to have the report available in the PoliSys®EE application. Our team responded by not only getting the report developed, but releasing it throughout the entire state before the effective deadline!

New Jersey Police Crash Investigation Report

Form fields include: 01 Date, 02 City, 03 County, 04 Agency, 05 District, 06 Division, 07 Shift, 08 Unit, 09 Vehicle, 10 Driver, 11 License, 12 Insurance, 13 Vehicle, 14 Driver, 15 License, 16 Insurance, 17 Vehicle, 18 Driver, 19 License, 20 Insurance, 21 Vehicle, 22 Driver, 23 License, 24 Insurance, 25 Vehicle, 26 Driver, 27 License, 28 Insurance, 29 Vehicle, 30 Driver, 31 License, 32 Insurance, 33 Vehicle, 34 Driver, 35 License, 36 Insurance, 37 Vehicle, 38 Driver, 39 License, 40 Insurance, 41 Vehicle, 42 Driver, 43 License, 44 Insurance, 45 Vehicle, 46 Driver, 47 License, 48 Insurance, 49 Vehicle, 50 Driver, 51 License, 52 Insurance, 53 Vehicle, 54 Driver, 55 License, 56 Insurance, 57 Vehicle, 58 Driver, 59 License, 60 Insurance, 61 Vehicle, 62 Driver, 63 License, 64 Insurance, 65 Vehicle, 66 Driver, 67 License, 68 Insurance, 69 Vehicle, 70 Driver, 71 License, 72 Insurance, 73 Vehicle, 74 Driver, 75 License, 76 Insurance, 77 Vehicle, 78 Driver, 79 License, 80 Insurance, 81 Vehicle, 82 Driver, 83 License, 84 Insurance, 85 Vehicle, 86 Driver, 87 License, 88 Insurance, 89 Vehicle, 90 Driver, 91 License, 92 Insurance, 93 Vehicle, 94 Driver, 95 License, 96 Insurance, 97 Vehicle, 98 Driver, 99 License, 100 Insurance.

NJTR - 1 (Rev. 01/17)

Enforsys Introduces New CAD.

Intro To EE Unit Based CAD.

Enforsys is pleased to announce the introduction of the PoliSys®EE-UB Computer Aided Dispatch module. Enforsys has been working over the past two years developing a Unit Centric CAD to address the needs of the growing regional dispatch centers as well as requests from many of our agencies. Enforsys continues to invest in and develop our applications to suit the growing needs of our customers and other Public Safety agencies. We look forward to the other additions which will be coming out in the next months which will further enhance our new Enterprise Edition CAD.

This user interface was developed after hundreds of hours talking with our customers and other users who shared their thoughts and ideas as to what they would like to see in CAD. After investing the time into research our development team got to work! The end result is another intuitive, user-friendly system unlike others in the industry today. This new CAD environment as with our previous EE edition is a fully integrated multi-jurisdictional state-of-the-art decision support system that includes CAD, RMS, and full mobile computing. PoliSys®EE provides a real-time link between agencies, with flexibility and user-friendly features that enables each agency to configure the system to meet their needs; yet jointly respond to events while retaining individual requirements.

Network Security

Network security, threats , backup plan..

Utilizing technology in the Public Safety environment today is the norm and has provided Law Enforcement organizations to be better equipped to accomplish their missions. Today's ever growing technology provides officers with a level of safety and effectiveness by being better equipped with information at their fingertips. However with these benefits there are risks on how to keep my information and data centers safe?

While using the advanced technology today, data security has to be top-of-mind for Public Safety Organizations.

With the massive increase in malicious network attacks, agencies have to be concerned about the security of their data and networks. Through a past Cybersecurity Threat Report, Ransomware increased 35 percent in 2015. Cyber criminals are using common tools we use to protect our data and networks, like encryption against us by hacking into networks and holding agencies' critical data hostage whereas the only way to unlock your data is to "Pay the Ransom". These threats originally seemed to focus on businesses and banks, spreading to health care and government, and

NJSP CYBER CRIMES UNIT:
(609) 584-5051 EXT. 5664

now have been infecting Public Safety organizations.

In order to best protect your

"If you spend more money on coffee than IT security, bad things will happen."

Richard A Clark

data infrastructure, we would recommend you consider:

Conduct Periodic Risk Assessments.

Keep Security Software current and patched.

Have a solid data Backup/Data recovery plan.

Stay ahead of cyber threats.

Thinking NIBRS?

New Jersey NIBRS is on the way and Enforsys is ready with PoliSys® NIBRS Edition.

In the 1980s, the FBI's UCR Program launched NIBRS, a modernized alternative to submitting crime data via the traditional SRS. NIBRS enriches the quality of UCR data collected by allowing agencies to capture detailed information on each incident. The data collected in NIBRS include crimes (murder, rape, robbery, etc.) that have routinely been reported to law enforcement in the nearly eight and a half decades of the UCR Program; as well as crimes that have been increasingly brought to the attention of law enforcement, such as hate crimes and domestic abuse. NIBRS is also structured to collect specific information on the victims and offenders of all crimes.

Reporting these more complete, incident-based accounts of crimes equips agencies with vital information needed for law enforcement administration, operation, and management. For example, NIBRS captures expansive data on drug activities, such as whether an offender was suspected of using drugs during the commission of another offense; the type and quantity of drugs seized in an incident; as well as the age, sex, race, and ethnicity of offender(s) and arrestee(s) of drug violations.

New Jersey is moving forward with their pilot program to have Law Enforcement in New Jersey start submitting NIBRS. Enforsys is standing by with our PoliSys® NIBRS Edition

Plan and be ready

THINGS TO LOOKOUT

FOR IN THE MONTHS

TO COME

► Special Needs Module

Advanced functionality providing the ability to enter subjects that have special needs.

► Enhanced Paging Module

Utilizing new technology for better performance and added functionality.
